

POWERFUL INGREDIENTS WORK TOGETHER TO **SUPPORT YOUR HEART.**

L-ARGININE is a vital amino acid that is best known for its cardiovascular benefits. In the body, l-arginine is converted to nitric oxide, which helps to reduce stress on the heart, improve circulation, and enhance overall function. ProArgi-9+ contains 5,000 mg of pharmaceutical grade l-arginine.

L-CITRULLINE is an amino acid that is metabolized to yield more l-arginine, which in turn generates additional nitric oxide.

RESVERATROL, or red wine extract, is high in antioxidants, anthocyanins, and polyphenols, which help support the heart by reducing LDL oxidation.

VITAMIN D3 enhances the body's ability to absorb calcium, helping to ensure that adequate amounts of calcium are supplied to the skeletal system and to reduce excessive calcium levels in the blood—an important component to cardiovascular health.

OTHER IMPORTANT INGREDIENTS:

- Folic Acid
- Pomegranate
- Ribose
- Vitamins B6, B12, and K2

Experience the benefits from any of the following ProArgi-9+ flavors:

GRAPE* • **CITRUS BERRY** • **MIXED BERRY**

Canister (30 servings) - \$84 SRP

Single Serve Packets (30 packets) - \$84 SRP

Jumbo (180 servings) - \$282 SRP

CLINICALLY **PROVEN**

“Numerous studies have shown the cardiovascular benefits of l-arginine; however, human studies show that the unique combination of ingredients in our ProArgi-9+ formula enhance the effects of l-arginine within the body in several ways.”

DR. MATTHEW TRIPP, Chief Scientific Officer,
Renowned Microbiologist & Geneticist

The effects of ProArgi-9+ are important, impressive, and increasingly needed in the world today. Thousands of people have put ProArgi-9+ to the test and have experienced a broad spectrum of benefits.

GOOD HEALTH BEGINS WITH A **STRONG HEART.**

The heart is the most important muscle in the human body. When functioning properly, this life-sustaining organ delivers vital nutrients to the vast network of cells, tissues, and organs. ProArgi-9+ has been formulated to support the heart and provide a variety of heart-focused benefits.

REDUCED LDL CHOLESTEROL OXIDATION

Studies have confirmed that the unique combination of ingredients found in ProArgi-9+ do indeed potently inhibit myeloperoxidase (a problematic enzyme that obstructs nitric oxide), and helps to reduce the oxidation of LDL cholesterol.

RAPID INCREASE OF NITRIC OXIDE

ProArgi-9+ is the highest quality l-arginine supplement in the world. The body converts l-arginine into nitric oxide, the powerful molecule that supports the arteries, enhances blood flow, and supports muscle, heart, and central nervous system function.

While l-arginine alone gradually increases the body's nitric oxide levels, studies have proven that these levels are more rapidly and significantly increased by the complete ProArgi-9+ formula.

ADDITIONAL BENEFITS:

- Helps relax arterial walls
- Helps maintain already normal blood sugar levels
- Supports blood flow to muscles and vital organs
- Maintains already normal blood pressure
- Delivers a pure, potent blend of ingredients in an easy-to-drink mix
