

VITAMIN D3

SYNERGY

Vitamin D3 is one of the most useful nutritional tools we have at our disposal for improving heart health.

The human body is equipped with the ability to synthesize this essential vitamin through exposure to the sun's ultraviolet rays.

Studies have shown that fifteen to twenty minutes of daily sun exposure will manufacture an approximate 10,000 to 15,000 units of vitamin D3 in the body. However, today's indoor living and extensive use of sunscreen has resulted in a society where millions are deficient in this life-sustaining vitamin.

Vitamin D3's effect on the body's numerous biological functions is vital to our health and well-being. Of the many roles it fulfills, facilitating calcium absorption is perhaps the most important. Studies have shown that vitamin D3 plays an important role in maintaining optimal blood levels of calcium and phosphorus.

By enhancing the body's ability to absorb calcium, vitamin D3 ensures adequate supply to the skeletal system while reducing excessive levels in the blood. Doing so promotes bone mineralization while minimizing the effect of calcium on the cardiovascular system.*

Benefits

- Provides 500 IU of Vitamin D3 per tablet
- Helps maintain normal levels of calcium in the blood
- Helps maintain bone health
- Helps support a healthy immune system
- Facilitates calcium absorption in the body to support a healthy skeletal system

ITEM NO. SC74894 | 150 Tablets

Recommended Use: A factor in the maintenance of good health. Helps in the development and maintenance of bones and teeth and in the absorption and use of calcium and phosphorus. Calcium intake, when combined with sufficient Vitamin D, a healthy diet and regular exercise may reduce the risk of developing osteoporosis.

Dosage (adults and adolescents 14 and over): Take one tablet twice daily.

Medicinal Ingredients: Each tablet contains Vitamin D3 (cholecalciferol) 500 IU (12.5 mcg).

Non-medicinal Ingredients: D-sorbitol, D-mannitol, xylitol, stearic acid, magnesium stearate, peach flavour, tropical citrus flavour, citric acid.

This bottle was sealed for your protection. Do not use if inner seal is missing or damaged.

Usage recommandé: Aide à maintenir une bonne santé. Aide au développement et au maintien des os et des dents, ainsi qu'à l'absorption et à l'utilisation du calcium et du phosphore. La prise de calcium, lorsqu'elle est combinée avec une quantité suffisante de vitamine D, à une alimentation saine et à de l'activité physique régulière, peut aider à réduire le risque d'ostéoporose.

Dosage (adultes et adolescents de 14 ans et plus): Prenez un comprimé deux fois par jour.

Ingrédients médicinaux: Chaque comprimé contient 500 UI (12.5 mcg) de vitamine D3 (cholécalférol).

Ingrédients non médicinaux: D-sorbitol, D-mannitol, xylitol, acide stéarique, stéarate de magnésium, saveur de pêche, saveur d'agrumes tropicaux, acide citrique.

Cette bouteille a été scellée pour votre protection. Ne pas utiliser si le sceau intérieur est manquant ou endommagé.
