

**Powerful ingredients
work in combination to
fight free radicals.**

Açai contains powerful antioxidants and anthocyanins, as well as an array of naturally occurring essential fatty acids, amino acids and plant sterols.

Pomegranate delivers antioxidant activity that was measured three times higher than red wine and green tea.

Cranberry contains a wide variety of compounds, but proanthocyanidins may be responsible for their beneficial effects on the urinary tract.

Blueberry was rated as the No. 1 antioxidant when compared to over 40 fruits and vegetables tested by the USDA Human Nutrition Center.

Elderberry may stimulate the production of cytokines, compounds that play a role in the immune response system.

The açai berry has been recognized as the world's No. 1 superfruit.

About Synergy WorldWide

Synergy WorldWide, led by Founder and CEO Dan Higginson, is a world leader in health and anti-aging products. The highly capable team of executives has more than 70 years of combined experience in the network marketing industry and the determination it takes to achieve success.

Since its founding in 1999, Synergy has established a proven track record of success in markets around the world. Synergy WorldWide is a division of Nature's Sunshine Products (NSP), a respected debt-free company with more than 35 years in the herbal-health industry.

MISTICA

Build **Boost** Circulate

SYNERGY
build • boost • circulate

Free radicals pose a threat to our health.

They damage the cells in your body by causing oxidation—the same process that makes nails rusty and apple slices brown—which contributes to premature aging, tissue damage, and other serious long-term health conditions.

Research has shown that the most effective way to defend against free radical damage is to boost the body's immunity with antioxidants. Synergy's Mistica accomplishes this with powerful ingredients like açai. The açai berry and other fruits found in Mistica are natural sources of anthocyanins and other antioxidants, which can neutralize harmful free radicals before they cause damage.

The OxiScore Antioxidant Test

A recent study looked at the effect of Mistica consumption on a test group representative of the general population that included smokers, diabetics and obese individuals. The test subjects drank two servings of Mistica a day for three weeks and were then measured using the OxiScore test which determines free radical activity. The results were impressive.

Approximately 80 percent of all the subjects showed a decrease in free radical activity, and the group overall experienced a 43 percent reduction in free radical cell damage.

“Many health issues are affected by free radical damage. The best way that we have found to reduce this damage is to consume good foods and take supplements such as Mistica that contain powerful antioxidants. Antioxidants truly have the power to boost the body's immunity and supercharge our health.”

—Dr. C. Norman Shealy, Synergy Medical Advisory Board

Anthocyanin Comparison

Anthocyanins impart color to plants and provide powerful antioxidant protection.

*This test was conducted by a reputable, independent lab with no financial connection to Synergy WorldWide. Mistica's effectiveness was measured against other leading liquid nutritional supplements containing blends of fruits such as noni, açai, goji, mangosteen, gac, seabuckthorn and amalaki.

Mistica fruit blend contains naturally occurring levels of:

- **Antioxidants** to help counter free radical damage and premature aging
- **Anthocyanins** to support the cardiovascular system
- **Essential fatty acids** to aid in digestive tract function
- **Phytosterols** to help maintain cholesterol levels already in the normal range

With its unique combination of antioxidants, anthocyanins and essential fatty acids, Mistica fights free radical damage better than any fruit blend supplement on the market.

Including a daily serving of Mistica in your nutritional regime helps enhance vitality while supporting your immune system and cardiovascular health.
