PhytoLife (74168) WADA Compliance

To Whom It May Concern:

The World Anti-Doping Agency (WADA) seeks to eliminate very specific natural and synthetic drug substances in certain quantities from high-level competition. WADA publishes a *Prohibited List* to define substances and methods prohibited at all times (in- and out-of-competition).

After careful review of the World Anti-Doping Agency (WADA) 2012 *prohibited substances list*, none of the ingredients in PhytoLife (74168) have been found to violate the WADA compliance standards. As a result, this product can be a safe and beneficial addition to the diets of high-level competitors concerned with avoiding substances banned by WADA.

During manufacture, quality assurance procedures are followed to ensure that PhytoLife (74168) is protected against adulteration, label ingredient claims are met, and that the finished product and ingredients, to the best of our knowledge, are free of athletic banned substances.

Sincerely,

Lynda Hammons
Vice President, Quality Assurance and Regulatory Affairs
Nature's Sunshine Products, Inc. and Synergy WorldWide
