

Body Cleanse

Fast track your weight management efforts with Synergy SLMsmart Body Cleanse. Featuring an efficacious blend of 35 time-honored herbs, this powerful formula helps rid the body of waste and unwanted toxins that can build up over time as a result of a poor diet, the environment, or the breakdown of stored body fat. Naturally gentle, Body Cleanse works with minimal interference with your daily activities. Purify and detoxify your body the easy way with SLMsmart Body Cleanse.

BENEFITS

- Purifies and detoxifies the body
- Helps eliminate toxins that build up during the breakdown of stored body fat
- Minimal interference with daily activities

KEY INGREDIENTS

- *Cleanse Tablets* — the herbs in these tablets work synergistically to create an environment that supports the health and viability of “healthy” microorganisms, also known as intestinal flora. These formulas help make the intestines inhospitable to foreign invaders, help remove debris and lubricate the colon to optimize intestinal

function. Ingredients such as whole leaf aloe vera, black walnut hulls, and Red Clover flowers act as nutritional storehouses, soothing the tissues lining the digestive track and containing biologically active compounds that support the digestion and absorption of food, all the while nourishing the intestinal system.

- *Detox capsules* — formulated to detoxify and cleanse the body of many common environmental pollutants. The formulation includes Cascara sagrada— or sacred bark, which has been used by cultures around the world as a nutritional support for proper waste elimination. Cascara sagrada acts as an herbal laxative, influences intestinal contraction and supports a clean, healthy colon. The detox capsules also include other strong, purgative herbs and protective, gentle and soothing herbs to enhance elimination, increase production of digestive enzymes and soothe the digestive tract.

RECOMMENDED USE

Take two packets daily; one packet with morning meal and one packet with evening meal.

FREQUENTLY ASKED QUESTIONS

How is SLMsmart Body Cleanse unique?

Some cleansing routines and products can be harsh, requiring people to make dramatic changes to their food intake. Many of these leave people with a need to constantly stay close to the restroom. Then, other cleanses are ineffective, containing very little of the ingredients that truly detoxify the body. Synergy’s Body Cleanse, on the other hand, contains a more gentle formula that works incredibly well alongside the other SLMsmart products and Essential Foods. Body Cleanse contains 35 time-honored herbs that combine to effectively cleanse and detoxify the body with less shock to the digestive process.

When should I take Body Cleanse?

Periods of weight loss are the best time to cleanse. During these periods, it is recommended that you take a packet with each morning and evening meal for the first week of every month. In other words, cleanse for the first seven days of every 30 day period. This kind of cycling will ensure effectiveness each time around.

Can I take Body Cleanse while not dieting?

Yes, Body Cleanse is safe to use whenever you choose to cleanse. However, Body Cleanse is most effective during times of controlled dieting (for example, when only Essential Foods are being eaten). To truly see the results of Body Cleanse, we recommend taking it as part of the SLMsmart System.

How much weight can I expect to lose on Synergy’s SLMsmart weight management program?

Over the course of 90 days, you can expect to lose at least 10% of your body weight, which is considered a healthy rate for weight loss, optimal for long term results.

How will Body Cleanse affect my day during periods of use?

Though Body Cleanse is built on a foundation of safe, naturally-gentle herbs, cleansing the body may lead to an increase in bowel movements, especially when combined with a high-fiber diet. Best results will be achieved by taking two packets of Body Cleanse per day, but individuals experiencing the rare

cases of extreme discomfort or inconvenience may choose to limit themselves to one packet per day within the seven day period.
