HEART HEALTH ELITE PACK

1 CoQ10, 1 Omega-3, 1 Vitamin D3, 2 ProArgi-9+ (Mixed Berry or Citrus Berry)
\$179 • 150 CV

A heart is similar to the sun in many ways. Its energy is constant and enduring, but without it life cannot survive. When the heart is strong, it's easier for all other body processes to operate at optimal levels. And with heart disease being the leading cause of death in the U.S., cardiovascular health has never needed more of our attention. It is vital that you do everything in your power to protect your life supply, which is why Synergy created a heart health pack that will give you peace of mind as you supply your heart with the fuel it needs for a long life.

CoQ10, or Coenzyme Q10, is an oil-soluble, vitamin-like compound found in every cell in the human body. Organs with the highest energy requirements, such as the heart, have an increased need for high concentrations of CoQ10 for the production of energy.

Omega-3 is a natural triglyceride fish lipid concentrate that provides EPA and DHA. The body does not produce these fatty acids on its own; they can only be obtained through the diet. Omega-3 contributes to the body's ability to balance its HDL to LDL ratio, therefore playing a role in sustaining normal blood pressure.

Vitamin D3 is often known as the vitamin the human body synthesizes through exposure to the sun, but what is less known is how far-reaching its benefits are. Vitamin D3 is essential to the normal functioning of the cardiovascular system because it regulates the absorption of calcium and phosphorous while also supporting the normal function of the immune system.

ProArgi-9+ is the powerful blend of amino acids L-arginine and L-citrulline, and a potent mixture of vitamins and minerals. L-arginine is the star ingredient of this formulation and has the scientific properties to convert into nitric oxide, a molecule that enhances the cardiovascular system. The far-reaching benefits of ProArgi-9+ have solidified its reputation as a powerful tool for overall elite health.
