\$185 • 150 CV

Synergy's skilled scientists and cosmetic chemists joined forces to create personal care formulas that work in harmony to maintain beautiful skin for every skin type. These premiere Elemence and TriAction formulas were designed using cutting-edge technologies in skin science to nourish, cleanse and beautify. Each product is rich in botanicals and vitamins to give a picture perfect, ageless look.

Elemence Bright Renewal Serum

A combination of concentrated skin-brightening ingredients and powerful anti-aging technologies is what gives Bright Renewal Serum its renewing properties. Uneven or excessive melanin production can cause discoloration that intensifies with exposure to the sun or the natural aging process. This serum is formulated with unique peptides, organic materials, and natural plant extracts that target specific skin cells to inhibit melanin production and fade discoloration.

Elemence Repair Complex

Repair Complex protects against and repairs damage caused by UV exposure and harmful environmental elements. A powerful combination of advanced enzymes with plant and algae extracts enhances the skin's natural recovery

responses and helps the skin resist the effects of external toxins and internal cellular stresses.

TriAction Skin Serum

Every facial expression causes the skin to wrinkle and pull. TriAction Skin Serum targets the permanent lines created by expressing yourself with fast-acting ingredients that smooth the skin's surface and help you look younger and healthier. So relax and keep smiling – expression lines won't make you frown anymore!

TriAction Skin Complex

Achieve a lifted, firm appearance with TriAction Skin Complex. As resiliency is enhanced and firmness is improved, the skin will receive a boost of youthful radiance.

TriAction Eye Concentrate

This unique eye area treatment targets all visible signs of aging, including crow's feet, under-eye wrinkles and dark circles. With immediate action and long-lasting results, TriAction Eye Concentrate helps you achieve a beautiful, contoured appearance. Increase your skin's firmness and decrease puffiness.
