\$200 • 150 CV

At the center of Synergy's Elite Health system, ProArgi-9+ enhances many systems in the human body making its powerful formulation the flagship of Synergy WorldWide's product offering. ProArgi-9+ is a smart addition to any nutritional regimen with enhancing benefits that make the product sell itself. It's recognized as the highest quality l-arginine supplement on the market today and is validated in the acclaimed Physician's Desk Reference. Its force for good can be found around the world.

ProArgi-9+ is a powerful blend of amino acids l-arginine and l-citrulline combined with a potent mixture of vitamins and minerals. L-arginine and l-citrulline have the scientific properties to convert into nitric oxide, a molecule that enhances circulation.

New studies on l-arginine are published daily, and some of the benefits discovered include enhanced immune function, improved energy levels, muscle-building support and reduced adipose tissue body fat. While l-arginine offers a multitude of benefits, it's most recognized for its impact on circulation and the heart. Studies show that nitric oxide relaxes the blood vessels which reduces stress on the heart and aids circulation. Increased circulation enhances blood flow to vital organs which strengthens the cardiovascular system. When circulation is strong, the body is strong.
